ABSTRACT

Data collected by the Association of Research Libraries (ARL) in a survey of salaries of library professionals for the fiscal years 1975-76 are analyzed. Tables and graphs display: (1) personnel distribution by salary level, 1974-76; (2) analysis of salaries at ARL university libraries, 1969-1976, comparing salary indices to consumer price indices; (3) median and beginning professional salaries in ARL libraries; (4) median and beginning salaries in non-university libraries; (5) median salaries in university libraries from 1974-1977 in rank order. (AP)

INTRODUCTION

A review of the salary data provided this year by ARL libraries indicates that ARL university librarians may experience a slight gain (3.8%) in purchasing power this year for the first time in four years (See chart below).

*Note that throughout this report 1969-70 is used as the base year in computing indices.

In analyzing the exact nature of this apparent economic recovery however, certain tradeoff costs must be figured into the computations. For example, in order to provide librarians with an increase in real income, it appears that a number of libraries have had to reduce the size of their staffs. Specifically, in the past year 86 ARL university libraries reduced by a total of 110 the number of professional positions in their libraries.

In addition, the significance of the gradual increase in the proportion of librarians in the higher salary brackets* must be weighed against the professional as well as economic implications of the decrease in turnover rates, which in turn affects the number of librarians being hired at the entry levels.

While each ARL library must analyze and interpret the data from the survey based upon its own interests and needs, it is clear that in our labor-intensive libraries, where approximately 60 percent of the total operating expenditures is used for salaries and wages, the figures as presented may have profound implications, not only for the continuing health of the profession, but also for the quality of services in ARL libraries.

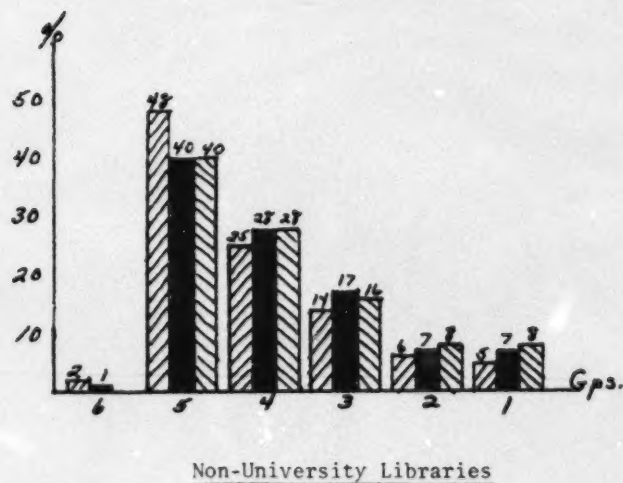

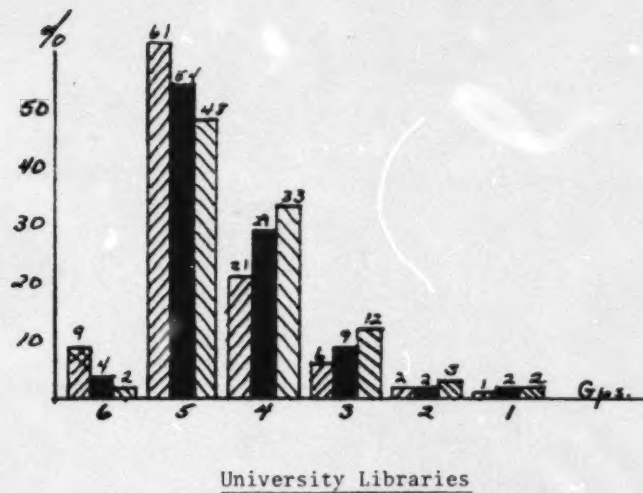

Suzanne Frankie
November 1976

*The graph on page 6 showing distribution of personnel by salary level indicates that in the last three years the proportion of ARL university librarians receiving \$15,000 or more has increased from 30% to 50%, while those receiving less than \$15,000 has decreased from 70% to 50%.

EXPLANATORY NOTES FOR THE ARL ANNUAL SALARY SURVEY

1. This survey deals with position salaries for the fiscal year 1975-76, as well as for the new fiscal year. For most libraries this means the survey will cover budgeted positions for the period July 1, 1975 through June 30, 1976, and estimated salary figures for July 1, 1976 through June 30, 1977.
2. The survey is concerned with the salaries for professional positions only. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term "professional." Each library should report the salaries of those staff members it considers professionals, including, when appropriate, staff who are not librarians in the strict sense of the term, such as computer experts, system analysts, budget officers, etc.
3. Salaries are reported for all available professional positions, whether filled or unfilled.
4. Salaries are reported for full-time positions only. Part-time positions are computed in terms of full-time equivalents.
5. The salaries for all professional positions are included, regardless of whether the salaries come from the regular library budget or from special funds such as research grants.
6. The salary figures are straight gross figures. Fringe benefits are not included.
7. The median salaries for the total number of positions in both university and nonuniversity libraries are approximations. Exact medians are not indicated because individual salaries are not reported, only salary ranges.
8. When beginning professional salaries are reported as a range, the lower figure is used for the tabulation.
9. Explanatory footnotes to the reported figures are provided when necessary.

PERSONNEL DISTRIBUTION BY SALARY LEVEL, 1974-1976

	1974-75	Group 1 - \$ 30,000 and over
	1975-76	Group 2 - 25,000 --- 29,999
	1976-77	Group 3 - 20,000 --- 24,999
		Group 4 - 15,000 --- 19,999
		Group 5 - 10,000 --- 14,999
		Group 6 - 7,000 --- 9,999

PERSONNEL DISTRIBUTION BY SALARY LEVEL

Figures in columns headed by dates show number of professional staff earning salaries in ranges shown in left hand column.

Figures in columns headed by % shown the percent of positions with salaries equal to or above first figure shown in the salary range column (e.g., in 1975-76 13% of the university librarians earned \$20,000 or more).

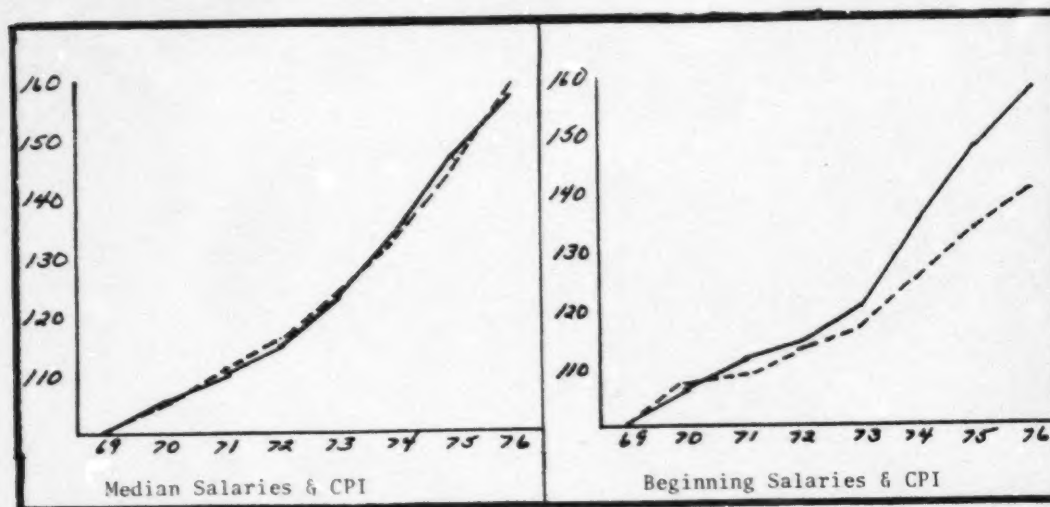

Gp.	SALARY RANGE	UNIVERSITY LIBRARIES				NON-UNIVERSITY LIBRARIES

BEGINNING PROFESSIONAL SALARIES IN UNIVERSITY LIBRARIES

Rank Order Tables

The tables on pp.18-19 display in rank order beginning professional salaries for each ARL Library. Because in a number of cases there is a relatively insignificant difference in the salary level between two institutions (which are nevertheless given two different rankings), it was decided that a "coarser" ranking institutions was desirable. Therefore, in addition to the individual rankings, institutions are clustered into groups according to ranges of beginning professional salaries. The number of libraries within each group is presented graphically below to illustrate the distribution of libraries by group as well as the change in distribution in the past three years.

BEGINNING PROFESSIONAL SALARIES-RANK ORDER TABLES

MEDIAN SALARIES IN UNIVERSITY LIBRARIES

Rank Order Tables

The tables on pp. 22-23 display in rank order median salaries for each ARL library. Because in a number of cases there is a relatively insignificant difference in the salary level between two institutions (which are nevertheless given two different rankings), it was decided that a "coarser" ranking of institutions was desirable. Therefore, in addition to the individual rankings, institutions are clustered into groups according to median salary ranges. The number of libraries within each group is presented graphically below to illustrate the distribution of libraries by group as well as the change in distribution in the past three years.

Group 1 - \$15,500 and over
 Group 2 - 15,000 --- 15,499
 Group 3 - 14,500 --- 14,999
 Group 4 - 14,000 --- 14,499
 Group 5 - 13,500 --- 13,999
 Group 6 - 13,000 --- 13,499
 Group 7 - 12,500 --- 12,999

Group 8 - \$12,000 --- 12,499
 Group 9 - 11,500 --- 11,999
 Group 10 - 11,000 --- 11,499
 Group 11 - 10,500 --- 10,999
 Group 12 - 10,000 --- 10,499
 Group 13 - 9,500 --- 9,999
